

# PSK-HANDBOOK 3

## VIBRATION MEASUREMENT IN CONDITION MONITORING

The handbook provides instructions for condition monitoring from the procurement phase to the refurbishment phase at the end of the machine's life cycle.

This 21<sup>st</sup> edition of the handbook contains 21 PSK Standards Association (PSK Standardisointi) standards for vibration measurement in condition monitoring.

The handbook provides an extensive and comprehensive information package for condition monitoring vibration measurement, which includes e.g., instructions on techniques, materials, testing, design, procurement, installation and troubleshooting.

The handbook is bilingual (Finnish and English).

PSK Standards Association workgroup  
**PSK 57**

The standards for the book have been prepared by the PSK Standards Association workgroup 57, which has represented experts in the fields of measurement, condition monitoring, equipment and component manufacturing, design, installation maintenance as well as operation and maintenance.

Workgroup PSK 57 has been developing and preparing standards for vibration measurement of condition monitoring continuously since 1989.
