

PSK-HANDBOOK 4

DESIGN, PROCUREMENT AND MANUFACTURING OF PRESSURE EQUIPMENT

The handbook clarifies the interpretation of the concepts of the Pressure Equipment Directive 2014/68 and domestic legislation and the roles and responsibilities of the various parties

This 8th edition of the handbook contains 8 standards prepared by PSK Standards Association (PSK Standardisointi) relating to the design, manufacture and procurement of pressure equipment, as well as laws, regulations and ordinances for pressure equipment within single covers.

The standards in the handbook help to classify pressure vessels, piping and accessories, present the differences related to the modules used in the assessment and present the roles and responsibilities of the parties in the supply chain with clear diagrams and tables.

The handbook also presents the documents used in supply chain of pressure equipment, the requirements related to their content and provide the models of these documents in Finnish and English.

The handbook is mostly in Finnish; standards PSK 4900 and PSK 4917 are bilingual (Finnish and English).

PSK Standards Association workgroup

PSK 49/4

The standards for the book have been prepared by PSK Standardization workgroup 49/4, which has been represented by experts from the fields of authorities and inspection bodies, as well as design, manufacture, suppliers and operation.

Workgroup PSK 49/4 constantly follows the development of legislation and when necessary, updates existing standards and prepares new standards.
