

PSK-HANDBOOK 8

PIPE SUPPORTING

The handbook consists of PSK standards concerning pipe supports and supporting into a single package specifically for use by designers, manufacturers and installation supervisors.

This 3rd edition of the handbook contains all 50 PSK Standards Association (PSK Standardisointi) standards which handle pipe supporting for industrial piping.

The standards compiled in the handbook provide guidance on pipe support design and selection of support materials, as well as support dimensions, allowable loads, and recommended drawing symbols. The standards also contain instructions for procurement and installation of the pipe supports.

PSK handbook 8 *Pipe supporting* together with PSK handbooks 7 *Pipe classes* and 9 *Industrial insulations* form the basic standards for piping design. All these handbooks are bilingual (Finnish and English).

PSK Standards Association workgroup

PSK 73

The standards for the book have been prepared by the PSK workgroup 73, which has been represented by experts in the fields of manufacture, design, operation, delivery and installation of pipe supporting.

The PSK 73 workgroup has been developing and preparing pipe support standards continuously since 1974.
